

Curriculum Vitae – Tong Zhu

Email 1: tongzhu@sjtu.edu.cn

Email 2 (Preferred): tong.zh@foxmail.com

Homepage: <https://firework471.github.io/>

Address: JD.com, Inc., Yizhuang Economic Development Zone, Beijing

Personal Profile

I am Tong Zhu, a member of JD.com's Tech Genius Team (TGT Program), and currently a Security Researcher in the Information Security Department of JD.com. I received my Ph.D. in Computer Science from Shanghai Jiao Tong University, advised by Professor Haojin Zhu. Previously, I received my bachelor's degree in Computer Science and Technology from the University of Electronic Science and Technology of China in June 2019, where I was advised by Professor Ting Chen. My current research focuses on mobile security and privacy protection, specifically advertising anti-fraud based on dynamic and static analysis techniques and LLM-driven general advertising anti-fraud mechanisms. I have published several papers in top international conferences and journals, including ACM CCS ('21, '24) (CCF-A), USENIX Security '23 (CCF-A), ACM/IEEE TON '25 (CCF-A), IEEE ICDCS (CCF-B), DFRWS (CCF-C), and Digital Investigation (SCI), among others. From April 2019 to January 2020, I served as an Application Security Research Intern at QiAnXin Pangu Lab, responsible for researching mobile ad click fraud. I discovered and reported multiple medium- and high-risk vulnerabilities. I also serve as a regular reviewer for academic journals including PPNA (SCI). I was selected for JD.com's Tech Genius Team/Doctoral Management Trainee (TGT/DMT) Program and the Yicheng Outstanding Talent Program, a district-level talent program launched by Beijing E-Town (Yizhuang). I have also been appointed as an Advisory Expert of the Brand Marketing Ecosystem Security Service Center of the China Advertising Association and an IAB China Expert. I was awarded the sole Gold Award (Academic Category) of the 2024 China Advertising Great Wall Award (a national-level award), the ACM CCS'24 Student Travel Grant, UESTC People's Special, First-Class, and Second-Class Scholarships, the title of Outstanding Graduate of UESTC, and First Prize in the JD.com 2025 Hackathon, among others.

Education

Shanghai Jiao Tong University

2019.09 - 2024.12

Ph.D., Department of Computer Science and Engineering

Advisor: Prof. Haojin Zhu

Research Area: Mobile Security and Privacy

University of Electronic Science and Technology of China

2015.09 - 2019.06

B.Eng., Computer Science and Technology

Advisor: Prof. Ting Chen

Class Rank: Top 5% (GPA: 3.8/4)

Work Experience

JD.com

2025.02 - Present

Head of General Advertising Anti-Fraud Algorithm Group, Information Security Department *Research Area:*

General Advertising Anti-Fraud Algorithms

Honors and Awards

Yicheng Outstanding Talent, Beijing Economic-Technological Development Area	2026.4	Outstanding Graduate of UESTC	2019.6
Appointed as an Advisory Expert, IAB China	2025.1	UESTC People's Special Scholarship (Top 3%)	2018.12
First Prize, JD.com 2025 Hackathon (3/683)	2025.10	Level A Certificate for Comprehensive Quality of College Students in Sichuan Province	2018.10
JD.com Tech Genius Team/Doctoral Management Trainee (TGT/DMT) Program	2025.2	UESTC People's Second-Class Scholarship	2017.12
Only Gold Award, 2024 China Advertising Great Wall Award (Academic Category)	2024.12	Second Prize (Sichuan Provincial Division), National Mathematical Modeling Contest	2017.8
Appointed as Advisory Expert, Brand Marketing Ecosystem Security Service Center, China Advertising Association	2024.9	Outstanding Communist Youth League Cadre of UESTC	2017.5
ACM CCS 2024 Student Travel Grant	2024.9	UESTC People's First-Class Scholarship	2016.12

Research Interests

- **Mobile Security and Privacy Protection**

Research focuses on identifying and addressing emerging security threats in mobile systems, especially mobile advertising anti-fraud. Ph.D. research mainly focuses on: (1) mobile advertising anti-fraud, (2) static/dynamic analysis on mobile systems, and (3) LLM-driven general advertising anti-fraud mechanisms.

Publications

Conference Papers

1. **Tong Zhu**, Chaofan Shou, Zhen Huang, Guoxing Chen, Xiaokuan Zhang, Yan Meng, Shuang Hao, Haojin Zhu. Unveiling Collusion-Based Ad Attribution Laundering Fraud: Detection, Analysis, and Security Implications[C]. ACM 31st Conference on Computer and Communications Security (**ACM CCS'24, CCF-A**). ACM, 2024.
2. Lu Zhou, Chengyongxiao Wei, **Tong Zhu**, Guoxing Chen, Xiaokuan Zhang, Suguo Du, Hui Cao, Haojin Zhu. POLICYCOMP: Counterpart Comparison of Privacy Policies Uncovers Overbroad Personal Data Collection Practices[C]. The 32nd USENIX Security Symposium (**USENIX Security '23, CCF-A**). USENIX, 2023.
3. **Tong Zhu**, Yan Meng, Haotian Hu, Xiaokuan Zhang, Minhui Xue, Haojin Zhu. Dissecting Click Fraud Autonomy in the Wild[C]. ACM 28th Conference on Computer and Communications Security (**ACM CCS'21, CCF-A**). ACM, 2021.
4. Ting Chen, Zihao Li, Yufei Zhang, Xiapu Luo, Ang Chen, Kun Yang, Bin Hu, **Tong Zhu**, Shifang Deng, Teng Hu, Jiachi Chen, Xiaosong Zhang. Dataether: Data exploration framework for ethereum[C]. IEEE

39th International Conference on Distributed Computing Systems (**ICDCS'19**, *CCF-B*). IEEE, 2019, pp.1369-1380.

5. Xiaodong Lin, Ting Chen, **Tong Zhu**, Kun Yang, Fengguo Wei. Automated forensic analysis of mobile applications on Android devices[C]. Digital Forensics Research Workshop (**DFRWS'18**, *CCF-C*). Elsevier, 2018. (The first student author.)

Journal Papers

1. **Tong Zhu**, Zhen Huang, Lu Zhou, Guoxing Chen, Yan Meng, and Haojin Zhu. Collaborative Ad Fraud Detection in Ad Networks[J], IEEE/ACM Transactions on Networking, 2025 (**IEEE/ACM TON**, *CCF-A*.)
2. Xiaodong Lin, Ting Chen, **Tong Zhu**, Kun Yang, Fengguo Wei. Automated forensic analysis of mobile applications on Android devices[J]. **Digital Investigation**, *SCI Q3*, 2018. 26: p. S59-S66.(The **special issue** of the DFRWS'18. The first student author.)

Patents

1. Haojin Zhu, **Tong Zhu**, Yan Meng, Guoxing Chen. 2024. Method, System, Terminal, and Medium for Detecting Collusion-Based Ad Attribution Laundering Fraud in Mobile Advertising. China (**National Invention Patent**), Application No.: CN202410680121.9, under substantive examination.
2. Haojin Zhu, **Tong Zhu**, Yan Meng. 2022. Static Detection-Based Mobile Ad Click Fraud Detection Method, System, and Terminal. China (**National Invention Patent**), Grant Publication No.: CN113191809B, Grant Date: August 9, 2022, granted.

Student Work, Certificates, and Skills

Shanghai Jiao Tong University, Teaching Assistant for Graduate Network Security Fundamentals Spring 2021

UESTC, Class Monitor, School of Computer Science and Engineering 2015.9-2019.6

UESTC, Minister of the Secretariat, Student Union, School of Computer Science and Engineering 2016.9-2017.6

textbfUESTC, International Exchange Ambassador 2016.9-2019.6

CET-4: 601; CET-6: 588 2015

Academic Service

- Peer-to-Peer Networking and Applications (PPNA, *SCI Q2*): Regular Reviewer
